Dear Chip,

It was a good to see you again, and we are most excited with the prospect of helping you with the most spectacular dinosaur exhibit ever! As per your request, we have formulated a cost estimate based on the needed degree of accuracy and workability of the skeletons for repositioning. Alan Weinstein has already allocated the needed bone elements for the scaled models approximately the size of your rendering. Fortunately, this size allows us to create a much more detailed and anatomically accurate representation of these fossils. The finished models can be used together in the permanent exhibit as a caption.

All three models to be constructed to meet the following specifications:

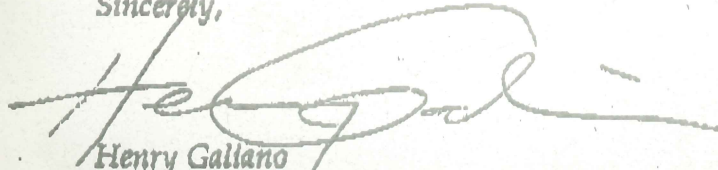

1. detail anatomical accuracy - enough to impress a Vertebrate Paleontologist
2. moveable parts - neck, tails etc.
3. dyed and painted to simulate a "fossil" finish
4. to be completed within 60 days or sooner depending on changes
5. not fixed to a permanent base
6. models to be assembled from natural bone elements

Adult standing Sauropod	\$ 1,720.
Young Sauropod	\$ 1,490.
Attacking Theropod	\$ 770.

\$ 3,980. total

Terms: 30% deposit and balance upon completion

Sincerely,

  
Henry Gallano  
President
