

Gerry,

Could you please review this draft of a letter of agreement from Research Casting International. This company, who we have worked with to develop the Dinosaur mounts in Roosevelt Hall, is building a model of a baby *Barosaurus* for the Orientation center on the Fourth Floor.

Peter May, the President of the company, was asked by Lowell and Rich Slawski to include in the contract work that has already been completed and paid.

I would appreciate some feedback from you by this Friday if possible.

Thanks.
